# Make Document-Signing Workflows More Efficient with BoldSign®

## Introduction

Since 2018, QWQER Express has operated as a courier service, connecting manufacturers with carriers to transport time-sensitive parcels. Whether it's coordinating same-day or same-hour deliveries, QWQER ensures every customer receives their packages in a secure and timely manner.

## Challenge

In the transportation industry, speed and accountability are crucial. However, QWQER was physically keeping track of signed agreements, which made it harder for the team to collect and manage paperwork efficiently. To streamline their document-signing process, they began searching for an e-signature solution. That's when they found BoldSign.

## Solution

With BoldSign, QWQER digitized its paperwork process, enabling clients to instantly sign and return contracts anytime, anywhere. According to Partnership Manager Elmira Minonoka, "The platform helped us speed up the signing process, reduce paperwork, and improve overall workflow efficiency."

To top it all off, QWQER now saves all its documents in a centralized location, enhancing accessibility. "Using BoldSign has significantly improved our document management process," Elmira said. "It has made it much easier to store documents electronically and quickly search for contracts when needed."

**Industry**

Transportation, Logistics, Supply Chain and Storage

**Product used**

BoldSign®
