How Vikingur F.C. Simplifies Football Contract Signing

Introduction

Haukur Hinriksson is the managing director of the Vikingur Football Club, a professional football club founded in 1908 in Reykjavik, Iceland. The nonprofit club now has eight divisions for eight different sports, with professional female and male teams for each. It also manages youth training and teams for these sports.

Challenges

Vikingur F.C. deals with a lot of contracts. For its athletes, Haukur estimates they have between 70 and 90 active contracts for its football division alone. The club has contracts with a lot of sponsors and coaches, particularly at the youth level. And then there are international contracts for competitions. The club needed an efficient, legally compliant way to get all these contracts signed.

Solution

Haukur knew his club needed a digital platform for collecting all those signatures. “It was much easier for us to adopt or implement an electronic signature process for all of those contracts that we make on a daily basis.”

He first tried a local platform, but it was very expensive and not user-friendly enough. So, he searched the internet for a solution specifically well-liked by other nonprofit organizations. He was directed to BoldSign.

Results

After implementing BoldSign, Vikingur F.C.’s signature woes were over. Haukur found it very easy to both use and teach others to use. The instructions are user-friendly and it’s easy to customize. Haukur can put signature lines, dates, and text boxes where he needs them.

“It's really comfortable,” he said. “And in the end, when the signatures are

Use case
Haukur shares how BoldSign transformed the club's contract-signing process. With over 80+ active contracts to manage across players, coaches, and sponsors, the club needed a solution that was affordable, secure, and easy to use.

over, you get it sent directly to you to your inbox. You don't have to log on to the platform to download the file or anything.”

One of the most attractive features of BoldSign was its adherence to international standards. Vikingur F.C. has to comply with Europe’s strict standards, such as GDPR, for its contracts to be considered legitimate. With BoldSign, compliance has not been a worry, and Haukur finds the audit trail document he receives after every signature completion to be reassuring.

Conclusion

The Vikingur Football Club’s administrative team can now get contracts signed with ease. Managing Director Haukur looks forward to checking out the rest of the Bold product line to see how else he can improve their workflows.

If your nonprofit needs a lot of contracts digitally signed, check out **BoldSign’s special program**, giving nonprofits free and heavily discounted access to the platform.
