Innovation Philosophy

An Affordable Way to Streamline Document Signing in AgedCare & Health

Introduction

Innovation Philosophy is an Australia-based AI and technology company focused on the aged care, healthcare, and community services sectors. Through its platforms AgedCareAI, Lisi, and EvZin, the company delivers secure, compliant digital solutions that support care delivery, workforce efficiency, compliance, and resident engagement. Innovation Philosophy works closely with aged care providers to reduce administrative burden, improve information access, and enable safe adoption of digital and AI-driven tools while remaining cost-effective and compliant with Australian regulations.

Challenge

As Innovation Philosophy expanded its product portfolio across AgedCareAI, Lisi, and Evzin, the volume of onboarding documents, contracts, and partner agreements increased significantly. As a result, CEO of Innovation Philosophy Manos Katris began searching for a reliable e-signature solution that could support paperwork for internal staff, aged care providers, and technology partners.

While testing enterprise platforms such as Docusign, the cost and features did not align with the company's scale and budget. Innovation Philosophy required an affordable, easy-to-use solution that could streamline document signing without adding operational complexity, so they turned to BoldSign.

Solution

Innovation Philosophy adopted BoldSign as its primary e-signature platform across all product lines. Now, the team uses BoldSign for employee onboarding, customer agreements, partner documentation, and recurring contractual workflows related to AgedCareAI, Lisi, and EvZin.

BoldSign®

Region
Australia

Use case
BoldSign is easy to use and eliminates the headache that often comes with large numbers of signed documents

One of the most valuable features has been BoldSign's templates, which allow the team to standardize recurring documents such as onboarding packs, NDAs, service agreements, and partnership contracts. This helps reduce manual errors, speed up turnaround times, and ensure consistency across all brands and products.

Additionally, by using shared templates with consistent formatting, fonts, and branding, Innovation Philosophy ensures all external-facing documents reflect a professional, unified identity while remaining flexible across different products and client types.

> "BoldSign is easy to use and eliminates the headache that often comes with managing large volumes of signed documents across multiple products and teams."
