How ABA TREE Streamlined Onboarding with BoldSign E-Signatures

Background:

In 2017, Laura Leonard, a BCBA and LBA, founded ABA TREE with the goal of helping families navigate and correct their children's problem behavior. ABA TREE not only provides the highest level of care for its clients but also invests in its behavioral technicians, providing ample training and support to help them reach their full potential.

Challenges:

From clients misplacing documents to forgetting to return entire packets, Nikki Adams, a member of ABA TREE, has seen it all. After years of dealing with missing paperwork, she knew it was time for the company to find a digital solution. She tried Adobe Sign but needed an e-signature service that was more user-friendly for a fraction of the cost, so she turned to BoldSign.

Solution:

Now, ABA TREE uses BoldSign for all its client intake and employee onboarding documents. "It's streamlined the process," Nikki said. She was particularly impressed by BoldSign's flexibility, which allowed her to tailor the service to ABA TREE's e-signature needs. "It was helpful that I could make clients add attachments with specific document types," Nikki said.

If you've been wanting an affordable e-signature service that's easily personalized, then look no further. From customizable logos and colors to email domains, BoldSign ensures that every business can send professional, branded e-signature requests that adhere to their business standards.
