Achieving Effortless Document Branding through a User-Friendly Tool

Introduction:

Redcat Hospitality Ltd. is an IT platform that has provided thousands of hospitality businesses with the tools to grow and manage their websites within a single system, including some of Australia's best hospitality venues.

Challenges:

Manually drafting branded documents was too time-consuming. Shaun, the UK Operations Director at Redcat, knew it was time for the company to find a digital solution. He tried using Adobe Acrobat Sign, which had some helpful features, but the e-signature service wasn't intuitive. He needed an app that could give him the best of both worlds—a wide range of components AND a user-friendly interface, so he turned to BoldSign.

Solution:

Thanks to BoldSign, Shaun finishes all of his branded documents with time to spare. He was pleased that the app was easy to use and helped him produce branded documents faster than ever. "The ability to create branded templates worked well," he said. "Now that the templates are set up, sending and signing documents only takes a few minutes."

Industry
Hospitality

Product used
BoldSign®

Region
United Kingdom

Use case
The abillity to create branded templates worked well. Now that the template are set up, sending and signing documents only takes a few minutes

> “It’s a great product. It has the functionality of the more expensive solutions, so it’s well worth the investment."
